

# Mindshift Services

Mindshift offer a range of services to suit your needs. Talk with us about what you need and we'll make it happen!

## Facilitated cyber security awareness planning sessions

We provide structure to your awareness planning with professional knowledgeable facilitation and a comprehensive written plan.

## Audience-specific cyber security awareness

Tailored training in various formats covering topics very specific to audiences such as Executive Assistants and front-line staff.

## Bespoke cyber security awareness campaigns

Creative, engaging awareness campaigns designed to tackle your big human risk areas (think social engineering, password safety, remote working), through a variety of delivery methods.

## Introduction to cyber security for leadership teams

If your leadership team need some context about what cyber security is, what's trending, terms simplified or they just need a private forum to upskill on the basics, we have experienced security consultants to help with this.

## Cyber security online modules

Mindshift work with you to create bespoke e-learning, ideal for larger organisations who want to communicate best business practices around digital safety. Mindshift also offer a series of short, interactive modules which can be tailored to your ways of working – ideal for medium-sized businesses who have a learning management system (LMS) but need cyber security content expertise and design help.

## Bring your security policies to life

We take a big dry security policy and distil it down to something people can relate to – through simple words, pictures, or animation.

## Specialist topic awareness

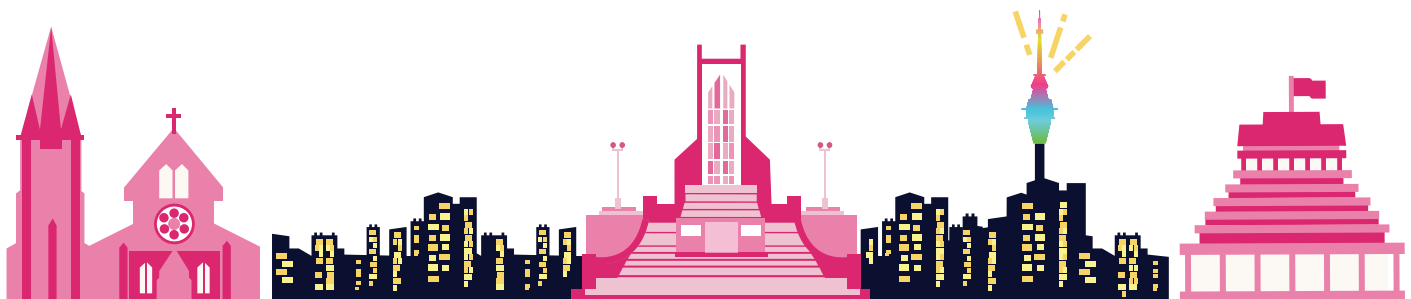

Tailored training and awareness to meet compliance requirements.

## Consulting

Utilise Mindshift's extensive experience with developing and running cyber security training and awareness programmes to enhance your own. Run your ideas past us, we will provide insights and feedback to help your programme flourish and campaigns succeed. This is an hourly rate service.
